ROMAN * HYACINTHS.

We wish to call special attention to these beautiful Roman Hyacinths, which are so valuable for early Winter blooming. They are among the few flowers which can be had as early as Christmas and New Years. Each bulb throws up several spikes of flowers, which are very beautiful and fragrant, and when kept in a cool room will keep perfect for weeks. Three can be planted in a four or five inch pot, and will soon be in flower. In the garden they are first of all Hyacinths to bloom. We offer extra large bulbs. The new Double ones are exceedingly fine. Do not fail to plant a good lot of them for Winter.

Single White.—Has elegant waxy-white bells of great beauty and fragrance. Price, large bulbs, 5 cents each; six for 25 cents; twelve for 50 cents.

Single Blue.—Lovely light blue, a fine contrast to the white variety. Price, 5 cents each; six for 25 cents; twelve for 50 cents.

Double Dark Pink.—A grand new sort with enormous double, bright, deep bells, in large spikes. Price, six cents each; four for 25 cents; twelve for 50 cents.

Canary Yellow.—New. Few novelties will come out this year

Roman Hyacinths for forcing in pots. If planted early and kept warm, can be had in bloom for Christmas.

which will in importance surpass this new Yellow Roman Hyacinth. There is nothing to be said of it except it is like the common Roman white, except in color, which is a lovely shade of light yellow. Price, 10 cents each; six for 50 cents.

SPECIAL OFFER.—FOR ONLY 20 CENTS WE WILL SEND ONE BULB OF EACH OF THESE FOUR FINE ROMAN HYACINTHS; THREE OF EACH FOR 50 CENTS.

FEATHERED HYACINTHS.

Cluster of Feathered Hyacinths.

A very pretty and curious species, the flowers of which are a feathered plume, borne on the end of a long spike. It is perfectly hardy, and is particularly adapted for open ground culture, and for indoor culture. Price, 5 cents each; six for 25 cents.

HYACINTH MONSTROSA.

This is the largest and, we think, the finest Double Hyacinth known. The spike is solid, and composed of florets which are two inches or more across. Each flower is composed of wide outside petals, while the center is filled solidly with small, twisted, quilled petals, making a flower as compactly double as a Dahlia. Color a fine shade of blue, while the outer rows of large petals are tipped with green, which gives it a most unique appearance. No matter how many Hyacinths you have, your collection is not complete without this most beautiful one. Price, 5 cents each; six for 25 cents.

SPARAXIS.

From the Cape of Good Hope, producing flowers about the size and shape of those of the Crocus. The colors are of an infinite variety. Pure white, yellow, orange, red, purple and violet are to be found, either separate or blended, in pleasing variation. Three or four bulbs may be put in a four-inch pot with good effect. They are charming. Try them. Price, 3 cents each; 30 cents per dozen.

DOUBLE TULIPS.

are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of half a dozen or more around the edge of shrubbery. They are robust growers and exceedingly effective. The early sorts (those indicated by A or B) do splendidly when grown in pots for Winter blooming, but must be forced much slower than Single Early Tulips by keeping them cooler. We keep the early and late varieties separate, so you can plant the ones that bloom early together if you so desire.

Have massive flowers of brilliant and varied colors, shades and markings, and, being double, the flowers last much longer in bloom than single varieties, and, in consequence, when singles and doubles are planted in conjunction the "time of the Tulips" is greatly prolonged. Double Tulips

Early Single Flowering Tulips, Named.

TULIPS are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for Spring bedding, and for Winter flowering in the greenhouse and window garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden as in a more favored place. Double and single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest day of Spring, plant between the lines of Tulips Scilla Siberica, Chionodoxa Lucilia, Snowdrops or Crocus, and as these flower first they can be removed or cut down when the Tulip is coming into bloom. The Single Tulip has a greater variety of rich, delicate and attractive colors than any other section of Spring-flowering bulbs. Those only who have massed the different varieties, planting the bulbs four inches apart, can form an idea of their beauty and their great diversity in shade and color, and the grand effect they produce grouped in flower beds or borders. The Single

Tulip is extensively grown for indoor decoration, three or five bulbs in a pot.

HOW TO GROW BULBS IN THE HOUSE IN WINTER.

THE past two Winters we have found out the best and prettiest way to force all kinds of bulbs in the house. "No one is too old to learn," is a true saying. And we have found it true in the manner of forcing bulbs. Our knowing how to force bulbs comes through our mother, from whom we learn much that is true and beautiful. This is the way she beautifies her whole house during the bleak, dreary Winter months: Take common split baskets, pecksize, such as are used to carry grapes to market in; they can be procured at any grocery store, fill with good, rich soil, and plant Hyacinths, Narcissus, Frezias, and, in fact, all bulbs in them. It is best to plant only one kind of bulbs in each basket. In one put Narcissus, in another Hyacinths, and so on. When planted water and carry to the cellar. After letting stand for a month or six weeks so as to become rooted, bring them in a living room (not too warm), water freely, and you will be surprised how easy and what beautiful flowers you can have. They need not all be brought up from the cellar at one time, but a few baskets at a time, and you will thus prolong their blooming several months, for as fast as the ones up are through blooming remove the baskets to the cellar and replace with other baskets that have been planted. We advise all our patrons to try this method, as the baskets are much better for the bulbs than flower pots.

THE GRAPE HYACINTH—IMPROVED.

Grape Hyacinths.

This charming little gem should be found in every garden in abundance. It has been termed the "Blue Lily of the Valley," and when planted in a mass with that sweet flower it does resemble it to some extent, and forms a most fascinating combination. It grows about the same height and blooms about the same time each Spring. It increases rapidly, and when once planted a mass of beautiful blossoms, which will increase each year, is in-

ured for a lifetime. But for Winter blooming in pots it is of the greatest value. Plant five or six Bulbs in a five-inch pot, and you will have as lovely a pot of bloom as you can imagine. Words fail to do it justice. Flower stems grow a foot in height bearing a dense spike of skye-blue bells tipped with white, and oh! so lovely. Please remember that ours is an improved strain of Grape Hyacinth, much superior to the old form. Improved Blue.—Price, three for 5 cents; twelve for 15 cents. Snow White.—New and scarce. Price, 2 cents each; 6 for 10 cents.

ORTHINOCALEM ARABICUM.

We introduce this as a new Winter-blooming bulb of great beauty and value. In magnificence there is nothing like it among Winter-blooming bulbs or plants. Even the grand Hyacinth must be preceded by the stately beauty of this flower. It is a native of Arabia. Bulb large and solid, closely resembling that of a Hyacinth, and requiring exactly the same culture. Leaves long and narrow; flower spikes eighteen to twenty-four inches high, strong and graceful, bearing an immense cluster of large, pearly-white flowers, having a jet-black center. The individual flowers keep perfect many weeks before fading, so that for more than a month this grand spike of bloom is in full glory. Its durability is almost without an equal among flowers. Add to this its delicate aromatic fragrance, and we have a Winter-bloomer which all must admit stands without a rival. Its culture is the easiest, as it will grow in any position in any window. A bulb can be planted in a four-inch pot, or several in a larger pot or box. Pot in September, October or November. They can even be kept and planted as late as February first. For open ground culture they do well if protected from freezing severely. Price, 6 cents each; three for 15 cents.

CROCUS.

The Crocus is one of the first flowers of Spring, and one of the best for blooming in the house during Winter. Half a dozen bulbs may be planted in a pot, and will make a very pretty show. For garden culture plant bulbs two inches deep and two or three inches apart. They are so cheap and pretty they ought to be found in every garden in abundance. They bloom splendidly when planted on the lawn among the grass. They lift their bright heads up through the sod very early, and give the lawn a charming aspect. The sorts we offer are especially strong and fine.

Price, 8 cents per dozen; 40 cents per hundred, by express. If by mail, 50 cents per hundred.

Daffodils and Narcissus.

"Daffodils.

*That come before the swallows dare, and take
The winds of March with beauty."*

SHAKESPEARE.

THE wonderful creations in the way of new varieties has awakened an interest and enthusiasm among the lovers of flowers that has placed this, "The Flower of the Poets," in the front rank of popularity and they merit all the praise that can be bestowed upon them. Appearing, as they do just after bleak Winter, they turn our gardens, lawns and woodlawn walks into gorgeous masses of gold and silver, with a fragrance that is enchanting. They are equally valuable for growing in pots for Winter flowering, and some of the varieties are forced in immense quantities by florists for cut-flowers in Winter. Narcissus are of the easiest culture, and all excepting the Polyanthus varieties on page 14 are perfectly hardy. Our collection has been much enriched, and embraces in addition to the old favorites many new varieties, including the magnificent new hybrids. We are also importing direct from China some of the genuine and wonderful "Chinese Oriental Narcissus," called by the natives "Joss Flower," or "Flower of the Gods." See page 15.

THE

**Chinese Sacred,
OR
Oriental Narcissus.**

(A variety of Polyanthus Narcissus.)

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery-white, with golden-yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient custom, to herald the advent of their new year, and as a symbol of good luck.

The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxuriant growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere and with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the Winter. See cut. We are importing direct from China immense bulbs of the true large-flowering variety. Price, 15 cents each; four for 50 cents.

JONQUILS.

Chinese Sacred Lilly.

TRITELEIA UNIFOLIA.

This is one of the choicest additions to Winter-flowering bulbs that has been offered in many years. The bulbs are small, and several can be planted in a pot, each one of which will send up several flower scapes, bearing star-shaped blossoms one inch in diameter pure white, elegantly lined with celestial blue. As the flowers follow each other successively, and last a long time before fading, a pot of these bulbs is never without flowers for several months in midwinter. They are also quite hardy, and can be planted in the open ground, where they will bloom elegantly in the early Spring. Price, fine bulbs, 4 cents each; three for 10 cents; twelve for 35 cents.

SCILLA SIBERICA, OR SQUILL.

(STAR HYACINTH.)

Scilla Siberica is one of the loveliest Spring flowers. It has a color almost as deep as the sky itself. It is quite hardy, and flowers out of doors at the same time as the Snowdrop, in front of which it has a charming effect. If planted in pots and kept indoors it may be had in bloom as early as Christmas. Its magnificent, bright blue color makes it suitable for any decorations whatever. Price, two for 5 cents; 25 cents per dozen.

Lanceolata.—We flowered this lovely variety for the first time last Winter, and are greatly pleased with it. It is a rapid grower, attaining a height of about fifteen inches, very graceful in habit, and bearing three to ten bell-shaped flowers, which are beautiful for their oddity of color. The outside is a greenish color, while the inside is yellow, spotted with brown. It is curious and odd, and well worthy of a place in every collection. Price, 10 cents each; three for 25 cents.

Lilies for Fall Planting.

THE TRUE BERMUDA EASTER LILY

Lilium Harrisii.

"The fairest of all things that blossom and grow,
Sweet as the Summer and pure as the snow,
Is the Lily that tells
Like the glad Easter bells,
Once more the sweet story which all hearts should
know."

This peerless Lily is the greatest acquisition to floriculture made in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and other special occasions, render them invaluable. The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open, or partially open, they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals throughout the Winter. The quantity of bloom produced is marvelous, the average production of bulbs five to seven inches in circumference, even when forced, is from five to eight flowers, and of bulbs seven to nine inches, eight to twelve flowers; and if desired a second crop of flowers, frequently equal to the first, can be

secured the same season by drying the plants off after blooming for a time and then again starting them. Blooming plants in pots form typical Easter offerings and presents, for decoration of the window, table, house or church. Nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every Winter for this purpose. As a garden Lily it is of great beauty, being entirely hardy excepting in northern climates, where it requires a protection of leaves or litter to the depth of five or six inches. Price, 15 cents each; four for fifty cents.

Larger bulbs, 20 cents each; three for 50 cents.
Extra large, 30 cents each, or three for \$1.25.

Lilium Candidum.

The old-fashioned pure white Garden Lily, also known as Easter Lily and Anunciation Lily. One of the hardiest. Flowers snow-white, with heavy yellow stamens and sweetest fragrance. It bears from five to twenty blossoms. This is the most decided variety we have in expressing its preference for a planting time. It must be planted in the early Autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. The bulbs are sometimes kept in cold storage for Spring sales, but never do quite so well. We have a very large sale of this bulb to florists for forcing for Easter trade, and have imported this season eighty thousand bulbs. The prices are lower than for many years, and bulbs very fine. Customers will do well to plant a bed of twenty-five or more for a permanent bed or border. Price, 20 cents each; three bulbs for 50 cents; \$1.50 per dozen.

AURATUM,

The Gold-Banded Lily of Japan.

This is the highest type of flowering bulbous plants. The most beautiful and fragrant of all our list. The flowers are of immense size, being fully twice as large as those of almost any other Lily. There is wonderful beauty in the growth of this gorgeous flower; first, the dry, scaly bulb, then the sturdy stalk pushing through the earth, next the dark green leaves and flower buds, and finally, the dazzling white and gold blossom. This noble Lily when first introduced into this country, but a score of years since, sold at five dollars each, can now be had for a trifle. The new bulbs are brought from Japan for us each year, and only such will give best results. They are shipped to us wrapped in a ball of clay and arrive plump and sound, every one ready to bloom. Price, fine bulbs, 20 cents each; three for 50 cents; \$1.75 per dozen, post-paid.

Tigrinum Flora Plena.—Bright orange, spotted black and very double. Price, 25 cents each; three for 60 cents.

Speciosum Lubrum.—A beautiful bright rose, spotted with a rich, velvety-crimson. Price, 25 cents each; three for 60 cents.

The Auratum, Tigrinum and Speciosum Lilies not ready till November.

LILY of the VALLEY.

The Lily of the Valley is one of the most useful and greatly admired plants grown; the modest bell-shaped flowers of purest white are highly prized for cutting purposes,

Hyacinthus Candicans.

Lily of the Valley.

and for flowering in pots in the Winter they are exceedingly well adapted. Beautiful and most interesting ornamental designs for the parlor or conservatory may be produced by planting the Lily Crowns in Crocus pots or in pyramidal pots made specially for this purpose, and pierced with holes. They will last several weeks in beauty. By taking them in at intervals a succession of different designs may be kept up all Winter. They are also forced in immense quantities by florists, but they are the most charming when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy. See cut. Price, 3 cents each; 30 cents per dozen.

HYACINTHUS CANDICANS.

This is not unlike our Spring-blooming Hyacinths. Its leaves are deep green, fleshy, resembling some of the Yuccas. The flowers are white, in handsome, pendulous bells, arranged on pyramidal spikes, often reaching to the height of three feet or more in strong plants. A strong bulb will give from two to three flower spikes, and these produce from thirty to fifty flowers. The plants come into bloom in July, and bloom continuously until October. It is hardy. See cut. Price, 10 cents each; three for 25 cents.

FREESIA REFRACTA ALBA.

No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicious, being a mixture of Mignonette, Violet and Jasmine, and one plant is sufficient to perfume a large room, without the overbearing perfume of Hyacinths or Tuberoses. The plant has tooth-shaped bulbs and flat, spreading leaves. Its cultivation is of the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window and watered more as growth progresses. When out of flower, store in some place and repot at proper season in fresh soil for another year's growth. See cut. Price, 3 cents each; six fine bulbs for 15 cents; twelve for 25 cents.

RANUNCULUS.

This class of bulbous plants is among the finest of all flowers. The French Ranunculus especially are distinguished by great strength, size and beauty. They attain to a height of from ten to fifteen inches, and the hues and colors of their many varieties, varying from pure white and yellow to bright vermilion and crimson, are really beautiful. The Persian Ranunculus are a little smaller than the French, and also more dwarf. However, their colors are as fine, and exhibit the most beautiful shades, and are of the most graceful form. The Turban, or Turkish, Ranunculus differ very much from each other, and display lovely oriental beauty of coloring. Can be grown easily in pots, or out of doors if protected. See cut.

Persian Ranunculus.—Price, 3 cents each; 30 cents per dozen.

Turkish Ranunculus.—Price, 3 cents each; 30 cents per dozen.

French Ranunculus.—Price, 4 cents each; 40 cents per dozen.

Chionodoxa Lucillæ—Glory of the Snow.

One of the most lovely flowering Spring bulbous plants ever introduced, producing spikes of lovely azure-blue flowers, with pure white centers. It is one of the earliest of all flowers, blooming before the Crocus, and sure to be more than satisfactory to those who plant it. For Winter-blooming this bud is also lovely. Price, strong home grown bulbs, 3 cents each; twelve for 30 cents.

Freesia Refracta Alba.

Giant Snowdrops.

Beautiful, dwarf, white flowers, pushing up through the snow in the Spring, a habit from which arose this name. They are lovely little blossoms, and should be found in every garden. Indoors they are equally pretty, and easily brought into bloom. Being dwarf, they are usually planted along walks or the margin of beds. The Giant Snowdrops we offer are much superior to the common varieties, producing larger flowers. See cut.

Giant Single Snowdrop.—Price, 2 cents each; 20 cents per dozen.
Giant Double Snowdrop.—Price, 3 cents each; 30 cents per dozen.

The Floral Fire-Cracker.

(BRODIAEA COCCINEA.)

This beautiful and interesting Winter-blooming bulb is a sort of Brodiaea, but entirely unlike any other variety in both form and color. It is a striking beauty, and one that catches every eye. Its blooms are borne in clusters at the end of long, slender stems, and droop like a Fuchsia. They are two or three inches in length, of a deep, bright, crimson-scarlet color, tipped with green and white. It is among the easiest of all bulbs to grow, and it is sure to succeed and bloom elegantly with any one. Pot the bulbs at any time during the Fall, and treat them as recommended on leaflet accompanying each order. In this lovely flower our friends will find a most beautiful and novel thing, and unlike anything you have ever grown or seen. See cut. Price, fine bulbs, 5 cents each; six for 25 cents.

IXIAS.

The Ixias produce their beautiful flowers in spikes, and are of the most dazzling and brilliant colors, and sure to attract great attention. It is only a few years that they have been grown in this country to any extent, but in that time, like the Freesia, they have become very popular. For pot culture in the house they give great satisfaction, being of easy culture and free bloomers. Half a dozen bulbs can be planted in a five-inch pot, and the display will be magnificent. For open ground culture give them Winter protection with leaves or straw. They are very cheap, and all lovers of odd and beautiful flowers should certainly add them to their collection. The sorts we offer are new and very fine. Price, 3 cents each; six for 15 cents; 25 cents per dozen.

IRIS---Flowering Flag.

(FLEUR DE LIS.)

The Iris are fast coming into favor. They are entirely hardy, and increase rapidly when planted in the flower garden. They should be planted in the Fall.

Iris, Susiana.—If every lover of flowers could see this grand plant in bloom we really believe not one in one hundred

would refuse to pay one dollar each for one or more bulbs of it. Among all flowers there is hardly one of such oddity and striking beauty. The bloom is of enormous size, and in describing it we say "it is chocolate and black mottled, beautifully veined with grayish white," yet from this no one can form a correct idea of how the plant looks. It is indescribable, and the planter will be surprised when he sees it. It is perfectly hardy, and blooms in May. In July the foliage dies down, and the bulbs lie dormant until late Fall or the next Spring. Try it, and when it blooms you will undoubtedly pronounce it the most beautiful flower in your garden. Ready in November. Price, 25 cents each; three for 60 cts.

Floral Fire-Cracker. (Brodiaea Coccinea.)

Bermuda Buttercup Oxalis.

An Unrivalled Winter-Flowering Pot Plant. Of the Easiest Culture, Succeeding with Everybody. It has Our Highest Commendation.

THIS is one of the finest Winter-flowering plants for pot culture that we have ever seen; it is such a strong, luxuriant grower that one bulb will be sufficient for a six or eight inch pot. Place in a dark, cool position for a few weeks to root thoroughly, and remove to a sunny situation in the window or conservatory in a temperature of about sixty Fahrenheit, and the great profusion of bloom produced in uninterrupted abundance for weeks will astonish and delight you. Flowers of the purest bright buttercup yellow. Well grown plants have produced as high as seventy flower stems at one time, and over one thousand flowers in one season. The flowers frequently the leaves fold up at night and open again the next morning, but when grown in a partially shaded situation the flowers remain open all the time. Properly treated, the plants will flower in six weeks from the time the bulbs are planted. We do not claim the Bermuda Buttercup Oxalis to be strictly a new plant, but a greatly improved selection from *Oxalis Cernua*, grown in the congenial soil and climate of Bermuda until the bulbs have attained great strength, producing bulbs, plants and flowers larger and more luxuriant in all parts than the type. Price, 6 cents each; 60 cents per dozen.

"The Oxalis you sent us for trial were kept during the Winter in a very cool greenhouse, and are only just now coming into full bloom. We yesterday counted forty fine clusters of bloom on one of the plants and the other has nearly as many. I do not think there has been a day since the plants got fairly started when there were not some blooms. It certainly forms a very attractive plant.

"March 24, 1894. D. M. FERRY & Co."

At times as many as fifty blooms could be seen on them at once, and they completely filled the house with their fragrance."

NEW DWARF EVER-BLOOMING CALLA LILY.

It is of a dwarf habit, and does not grow tall and scraggly like the old variety, but is compact, with a great abundance of lustrous, dark green foliage. It is a true ever-bloomer, its flowers appearing in great abundance both Summer and Winter when grown in pots, or it will bloom profusely all Summer long in the open ground and being potted in September will continue blooming without intermission all Winter. The same plant will grow and bloom for years without once ceasing, and the quantity of bloom which a good plant will produce is astonishing. It is estimated that six plants of the old sort will not produce so many flowers in the course of a year as will one plant of this new dwarf variety. A large plant is hardly ever without one or more flowers, and its dwarf, compact habit makes a much more

desirable pot plant than the old variety. Its flowers are large and snowy-white in color. All in all it is one of the most desirable plants we ever offered. Price for bulbs of blooming size, 30 cents each; extra large, 50 cents each.

PRIMROSE.—CHINESE.

Few houseplants afford better satisfaction. They bloom all Winter. It requires to be kept cool, a north window suiting best. Care should be taken in watering that no water gets on the buds, as it causes them to rot. In the Summer they can be turned out in a shady border. The plants we offer are very fine, and the colors will please.

Single White and Single Pink.—Price, 10 cents each.

"SURPRISE" COLLECTION.

15 ELEGANT WINTER BLOOMING PLANTS FOR \$1.00

Price, Separately, 10c Each.

New Pink Rose, MAMAN COCHET.—The color is a deep rose pink, the inner side of the petals being a silver rose, shaded and touched with golden yellow. We pronounce this the finest Rose by far that has been introduced from France in the past five years. Be sure to try it, as it will not disappoint you. We can, with full confidence, recommend this Rose.

New Tea Rose, QUEEN OF FRAGRANCE.—This elegant new Rose was raised in this country, and we are the first to offer it. It is a vigorous grower, has beautiful foliage, and the blooms usually come in clusters of from six to ten Roses. They are of the largest size. Color pure white, sometimes edged and tinged with a delicate shell-pink, and the fragrance is simply delicious, scenting up a whole yard. No Rose equals it for its elegant perfume. We recommend this Rose highly.

New Pure White Hybrid Tea Rose, KAISERIN AUGUSTA VICTORIA.—This beautiful Rose has not only a royal name, but is a royal Rose as well. We have white Roses that have elegant buds, but when full blown are not all that is desired. Then again, we have white Roses that are elegant when full blown, but have poor buds. This Rose combines both these good qualities. It is a continuous bloomer, producing successive crops of buds and flowers in greatest profusion. The buds are very beautifully formed, with large petals of best substance; shows no center when fully open. Color pure snowy-white; and when you add a rich perfume, coupled with a vigorous growth, what more could you ask?

Golden Yellow Rose, MADEMOISELLE CECILE BERTHOD.—Color a beautiful chrome yellow, deepening to the center to pure golden yellow, flowers very large, very double and full, and deliciously fragrant. A grand bedder. It produces magnificent buds, equal to Marechal Neil in color and size. Elegant, both for house and garden culture.

New Geranium, MRS. E. G. HILL.—A most distinct and pleasing shade of salmon, with light shading at the center. The shading at the center is variable, however. Trusses are very large and composed of an immense number of florets. A single variety.

New Geranium, BRIANT.—The color of the flower is a light vermilion-red, of a most pleasing shade. The flowers are absolutely perfect in shape, contour and make-up, trusses exceptionally large, and borne in immense spherical balls, often measuring eight inches in diameter. It does finely in the open ground, and is perfectly reliable as a bedding Geranium of the highest merit. It makes a compact, dense growth, and has all the qualities that go to make the perfect Geranium that it is. Fine also in pots.

OTAHEITE ORANGE, NEW DWARF ORANGE.—This is one of the prettiest plants we grow. Every one is delighted with it. It blooms and fruits when quite small. We have seen plants in bloom and fruit when but six inches in height. Don't fail to try it.

LATANIA BARBONICA.—The well known Fan Palm. This is one of the most exquisitely graceful among Palms. Its wide spreading, graciously arching leaves are elegant and effect-

ive for apartment decoration. It is considered the handsomest and most valuable of all the Palms.

CESTRUM, or NIGHT-BLOOMING JASMINE.—These beautiful shrubs are cultivated for the delicate fragrance of their elegant flowers, which are borne in clusters. They are of easy cultivation. *Cestrum Parqui* is a well known and highly prized plant, blooming nearly all the year. It is a native of Chili. An excellent garden plant, growing rapidly. Foliage long and a deep green color. Produces its richly fragrant flowers at every joint. It is also well adapted to house and window culture.

New Chrysanthemum, EUGENE DAILLEDOUZE.—This beautiful variety captivated all who saw it at the World's Fair. There is nothing brighter or clearer among yellows. The center of the flower is folded close, the outer petals are broad and incurving, and of great substance. It is full to the last degree, of great depth, and of the most perfect form. We consider this the crowning glory of the year in new Chrysanthemums. It is the winner of twenty first premiums and gold medals.

New Chrysanthemum, TRILBY.—Pure snow-white, and superior in every way to any white in cultivation. The petals are slightly twisted, but stand out straight, forming a bold, round, handsome flower of massive size. Extra fine stem and handsome foliage. In perfection November 20 to 30. Really one of the very best of this season's introduction. A prize taker wherever exhibited.

New Carnation, WHITE WINGS.—A pure snow-white variety, waxy, without fleck or tint, of the largest size, serrated edge; delightfully fragrant. Much the best white Carnation grown. Excellent for pot or garden culture.

New Ever-blooming Begonia, "VERNON."—This beautiful new Begonia has been universally accepted as the most useful and really meritorious novelty introduced for years. In habit and freedom of bloom it quite resembles the well-known Begonia *Semperflorens*. Its numerous flowers are of a brilliant deep carmine color and the foliage of a fine green color, spotted and margined with bronzy red, which grows more intense with the advancing season. The staminate flowers with their bright yellow centers give the last note of color, and contrast admirably with the brilliant red flowers and metallic foliage. Above all, it blooms with the greatest profusion throughout the entire Summer and Winter. It is without comparison as a beautiful blooming plant. Be sure and try it.

Hibiscus, SENATOR EVANS.—A beautiful Hibiscus. The shape of its flower is identical with the Auriantica, and has the same purple markings at base of petals. The color of this variety, instead of being orange, is a bright lemon color.

Jasmine, GRAND DUCHESS DE ORLEANS.—In this beautiful Jasmine there is combined some sterling qualities that place it a peer over existing sorts. Easy culture, fine grower, good bloomer, elegant fragrance, and double flowers of chaste and waxy-white appearance.

LARGE PALMS.

We advise the buying of good-sized Palms, as they are the most satisfactory. We have them in any size from \$1.50, \$2.00, \$3.00, \$4.00, \$5.00 each up to \$10.00 each. We can furnish plants four to five feet in height and four feet across, with six to eight immense leaves, each leaf eighteen inches to two feet in diameter, for \$10.00 each. These are handsome specimens, and are cheap as dirt at this price.

The following is a select list of rare and handsome varieties that can be recommended for apartments, conservatories, decorations or vase plants during Summer. They are all grand plants and of the easiest culture.

NOTICE.—It may be well to state here that young Palms do not resemble the illustrations given, as they do not show their character leaves until the second year, so that when you get your Palm plants and see long, narrow leaves instead of the character leaves, as shown in the illustrations, do not think that the wrong kind has been sent you.

It is considered the handsomest and most valuable of all the Palms. Price, 25 cents each; fine plants, \$1.00 to \$2.00 each.
- Washingtonia Filifera.**—A beautiful Palm is one of the finest additions that can be made to any collection of plants, but the high prices of the best varieties have prevented most people from possessing one. Then, again, there are but few of the best sorts which succeed well with ordinary window culture. It is, therefore, with pleasure that we are now able to offer one of the most beautiful sorts in existence, and one that is hardy and robust enough to succeed anywhere, at a price which brings it within the reach of all. It has elegant dark green, fan-shaped leaves, from which hang thread-like filaments as seen in cut. The plant is a compact grower, well adapted to pot culture, succeeding in any situation, and with any treatment that will keep a Geranium alive. It will flourish in any window for anybody, making a grand ornament during Winter, and in Summer it can adorn a veranda, or be placed about the garden or yard, or used for a center in a vase, basket or flower bed—always ornamental anywhere. All Palms of the fan-leaved sorts have, when young, leaves of a long, narrow shape, developing the round, fan-shaped ones as they grow older. Therefore when you get your plant and see long leaves instead of round ones, do not think that a wrong sort has been sent you. Price, 10 cents each; three for 25 cents. Strong plants, 50 cents each.

Oredoxia regia—ROYAL PALM.

Oredoxia Regia.—(*Royal Palm.*) This favorite Palm is beautiful in all stages of growth. No plant is more easily grown, and none more tenacious of life, enduring the dust, the cold and heat from open windows and gas-heated air of our dwellings. The demand for this particular kind is perhaps five times that of any other. Leaves large, fan-shaped, of a cheerful green color, plant of hardy constitution, and adapted to all decorative purposes, within or without doors. The cut shows a healthy plant about three years old. Price, 25 cents each; fine plants, 60 cents to \$2.00 each.

Filifera Palm.

- Kentia Fosteriana.**—This is one of the finest pot plants imaginable and the easiest to grow of any of the Palm family. The leaves are a deep, glossy green, fan-shaped, split deeply into segments. This is, without exception, the most hardy of its class. Very graceful for table decoration. Scarcely equalled. Price, 50 cents each. Strong plants, \$1.00 to \$2.00 each.

OTAHEITE ORANGE.

An elegant plant for Winter decoration. None finer.

This valuable and distinct variety of the Orange family is a dwarf, compact grower, with glossy, deep green foliage, which has a decided odor of the orange trees of Florida, and is exceedingly floriferous, producing a wonderful profusion of pure white flowers of the most delicious fragrance, identical with the much-sought-for blooms of Southern orange groves. Otaheite fruits immediately after flowering, bearing fruit about one-half the size of the ordinary orange, retaining in a marked degree their sweetness. This unique Orange cannot be equaled as a Winter-blooming pot plant for house culture, and is of the easiest culture. Requires but little sunlight, and flowers and fruits when but twelve to fifteen inches high. As a pot plant this lovely dwarf Orange is of the most novel and beautiful that can be grown. Price, 10 cents each; large, strong plants, to bloom and bear profusely at once, 25 to 40 cents each.

OLEA FRAGRANS,

—OR TEA OLIVE.

One of the most desirable flowering shrubs of Southern gardens, and also a favorite house plant in the north. Has deep green foliage similar to the Camellia. The white flowers, although small, are produced in great profusion, and emit the most pleasing fragrance. It has been well said that each individual bloom has more sweetness than the most fragrant Lily. The blooming period begins in the Fall, and lasts for several months. It is of easy culture, and especially desirable as a window plant. Nice plants. Price, 40 cents each.

Aloysia Citriodora.

Lemon Verbena.

Foliage delightfully fragrant. To simply brush against it is enough to scent an entire room with its delicious odor. Planted out of doors, it grows into a fine, large clump, and it can be taken up in the Fall and wintered over in the cellar. Price, 10 cents each; three for 25 cents.

APPLE-SCENTED GERANIUM.

This is a great favorite with everybody. Although it is an old plant, still it is rarely seen. We cannot give a reason for this, as it is a most charming plant. It makes handsome specimens in pots, and its delicious fragrance, which is that of ripe apples, will perfume a whole room. We offer good, strong plants at 20 cents each.

The growth of the plant is vigorous and healthy. Valuable, either in pots or planted out. A charming contrast with the white variety, Swanley White. Price, 15 cents.

SPECIAL OFFER.—The two new Violets for 25 cents.

SANSEVERIA ZEALANICA.

A New Decorative Plant of Great Beauty and Value.

A beautiful plant, splendidly adapted for the decoration of drawing-rooms and halls, as it stands drouth and dust with impunity, and requires scarcely any water. The leaves grow to a length of three to four feet, and are beautifully striped crosswise with broad, white variegations on a dark green ground. When you consider that it can be placed in any position in any room and do well, its great usefulness is at once apparent. Though grown mainly for the beauty of its foliage, it is by no means an insignificant flowering plant. It blooms usually during May and June, sending up great plume-like spikes a foot or more in length. The flowers are numerous and composed of long, narrow petals, which recurve gracefully and are of a creamy-white color. Price, fine plants, 10 cents each.

CAMELLIA JAPONICA.

The royal family of greenhouse plants. Leaves glossy-green, and flowers of the most exquisite beauty and waxy texture. From pure white to crimson, in almost endless variegation. The pure white ones generally prized above the colored varieties. Their culture is nearly related to that of the Azalea, but their success is more certain. Require shade and moisture throughout the hot season. Their time of blooming is Winter and early Spring. Requires a moderate and uniform temperature with as little artificial heat as possible. When set with flower buds, great care must be taken in watering—when left too dry the buds are sure to drop. We have a fine assortment of those named below. Price, for large, strong plants, 60 cents each.

Camellia, Alba Plena.—Double white, very fine, and the best white. **Americana.**—Blush, mottled with rose. **Caleb Cope.**—Clear blush rose. - Plumbago, Lady Larpent.**—This beautiful variety of Plumbago was first popularly introduced in 1890. Since that time it has so thoroughly pleased all who have planted it, achieved such great popularity, which, coupled with our own thorough tests and observations, demonstrated that it is unquestionably the most distinct and valuable hardy herbaceous plant now in cultivation. The plants are strong, upright in habit, growing to a height of twelve to fifteen inches in compact clumps, and from the middle of July until severe frost are covered with lovely rich violet-blue colored flowers borne in close terminal heads. (We had thousands in bloom on our grounds the past season as late as October 25th.) The foliage is unique, finely serrated and fringing the stems. We heartily recommend this fine variety for edging walks, beds or borders, or single specimens set in mixed flower vases or beds, where they appear in lovely contrast with other flowers. Price, 15 cts. each.
- New Pink Plumbago, Sanguinea.**—The Plumbagos are very desirable plants for bedding or house culture, and are admired by all for their elegant trusses of bloom and the delicate color of their flowers. The light blue, deep blue and white varieties are well-known favorites, but with the new variety Sanguinea we have something that is entirely distinct and the prettiest of all Plumbagos. The trusses of bloom are larger than in the older varieties, often measuring ten inches in length, and of the loveliest bright pink or deep rose. Order one and be surprised. Price, 25 cents each.

SIX EVER-BLOOMING CLIMBING ROSES

FOR THE
SOUTHERN AND PACIFIC STATES.

The World-Renowned Rose, MARECHAL NEIL.—A beautiful deep sulphur yellow, very full, very large and exceedingly fragrant. It is the finest yellow Rose in existence. It has a climbing habit, and where it is allowed to grow until it attains a large size, as it will in a few years, it yields thousands of beautiful golden-yellow flowers. Especially desirable in the South. We sell annually fifty thousand of this Rose alone. We have a grand stock of this variety. Price, 10 cents each.

Wonderful New Climbing Rose, EMPRESS OF CHINA.—This is a new climbing Rose of the greatest excellence. It commences to bloom in May and is loaded with its elegant blooms until December. Think of it! There is no other Rose like it that will bloom for so long a time. This has been the great objection to climbing Roses—that they bloom once and then are done. But here we have a Rose that blooms continuously for over seven months of the year. When it first opens the flowers are a beautiful red, but soon turn to a lovely light pink, and it blooms so profusely as to almost hide the plant. It is perfectly hardy and is a vigorous grower. Price, 20 cts. each.

THE MARY WASHINGTON ROSE.—This famous old Rose was newly introduced to the public recently. It is one of the most valuable sorts that has been introduced for many years. Its flowers are pure white, perfectly double to the center, sweet, and borne in endless numbers all summer. It is a vigorous and rapid grower, and must at once become a general favorite. It makes a great profusion of fine buds, which are borne on long stems and usually in large clusters. One plant of Mary Washington will produce more flowers and buds than a dozen ordinary Roses. Its fragrance is tinged with that old-fashioned musky flavor so much admired in olden times. Price, 15 cents each.

New Climbing Rose, CRIMSON RAMBLER.—The plant is of very vigorous growth, making shoots from eight to ten feet during the season, rendering it a charming pillar Rose. It is also magnificent in bush form, and for covering buildings, trellises, etc., it cannot be excelled. One of the striking characteristics of this Rose is its remarkable color, which is of the brightest crimson, which remains undimmed to the end, showing none of the objectionable purplish tint so common in crimson Roses. The flowers are produced in great pyramidal panicles or trusses, each carrying from thirty to forty blooms, the individual flowers measuring about one to one and a half inches in diameter and remaining perfect on the plant for upwards of two weeks with their freshness of color unimpaired. Price, 15 cents each.

REINE MARIE HENRIETTE.—This is a strong grower and continuous bloomer. The flowers are large, full and sweet. The color is a rich, scarlet-crimson, very beautiful, and a profuse bloomer. Nothing can compare with this for beauty of bud and foliage, and it literally lavishes in the greatest profusion its beautiful, rich, red flowers of magnificent size. This Rose has been awarded first premium wherever exhibited. It has our highest praise. Price, 10 cents each.

WILLIAM ALLEN RICHARDSON.—Orange yellow, with outer petals lighter, center copper yellow. Very rich. Rapidly becoming popular. This Rose was winner of the medal at New Orleans exposition some years ago. Price, 15 cents each.

Special Offer.—The set of six elegant climbers for 75c.

JASMINES.

Grand Duke of Duscany.—Easy grown, even small plants bearing a profusion of double, creamy-white flowers, having a delicious perfume. A plant of this lovely variety will, when in bloom, scent up a whole yard or house. It is sweeter than a tuberose, and that is saying a good deal for it. It can be stored in a dry cellar in Winter. Price, fine plants, 35 cents each; large plants, 75 cents each.

Cape Jasmine.—The well-known variety, grows into a fine large bush. Fine, rich, glossy foliage and large double flowers of delicious fragrance. Price, 20 cents each; large plants, 40 cents each.

Poetia.—Similar to Jasmine Grandiflorum. Flowers smaller, but borne in larger spikes. Makes a valuable climbing plant, though if desired can be grown in bush form. Price, 10 cents each; large plants, 25 cents each.

Maylayan, or Confederate Jasmine.—It blooms more profusely in Winter than at any other time, making it a most desirable house plant. The vine will live a lifetime. Price, 15 cents each.

Grandiflorum, or Star Jasmine.—A beautiful plant, with small, glossy, evergreen foliage. It blossoms in Fall and Winter. Price, 10 cents each; large plants, 20 cents each.

A Pillar of Reine Marie Henriette and Marechal Niel.
